DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, species I (claims 1 and 2) in the reply filed on January 14, 2005 is acknowledged.

Drawings

2. Figures 5a, 5b, 6 and 7 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Kortenbach (US 6,627,817).

Regarding claim 1, Kortenbach discloses a grommet (see figure 1) for holding a wire harness (50) including a plurality of wires (see figure 1), the grommet (see figure 1) comprising a first division member (4b, 2b), having a convex portion formed on an outer face thereof (see figure 1); and a second division member (4a, 2a), having a concave portion for receiving a water-stop portion (see figure 1), the concave portion having a shape corresponding to a cross-sectional shape of the wire harness (50), wherein an inner face of the first division member (4b, 2b) is pressed against the water-stop portion of the wire harness (50) when the convex portion of the first division member (4b, 2b) is pressed toward the second division member (see figure 1 or column 8 lines 56-61 or column 11 lines 1-11).

Regarding claim 2, Kortenbach discloses the grommet (see figure 1), wherein the inner face of the first division member (4b, 2b) of the grommet has a flat face (9 or 6).

Conclusion
